Management and Cost Accounting with Student Solutions Manual

Cost and Management Accounting - An Introduction

This is a text for introductory courses on cost and management accounting. It provides coverage of the elementary principles and techniques of costing and management accounting, and concentrates on the typical syllabus of a first year BA course.

Management and Cost Accounting

The market-leading European text on management accounting and comprehensive authority on all aspects of the subject has been streamlined and substantially redesigned in its 6th edition to make it even more suitable for the needs of today's student. The aim of the new edition is to explain the principles involved in the design and evaluation of management and cost accounting information systems. The emphasis in the book is on management accounting systems that will be used for internal decision-making purposes within an organisation, however, cost accounting systems for external reporting are also comprehensively covered. It has been brought up to date with the latest developments in the subject. Having been made stronger pedagogically with the addition of the answers to the questions and more real-world mini cases, the text brings home the relevance of the subject matter to the real world of business.

Costing - An introduction Teachers’ Manual

Management and Cost Accounting

Now in its eighth edition, this international bestseller has been widely recognised as the definitive textbook on management and cost accounting for over 25 years. Colin Drury expertly blends the theory and practice of management and cost accounting with extensive assessment questions and illuminating Real World Views, to fulfil all undergraduate and professional course needs in a single textbook. Management and Cost Accounting is ideally suited for use on management accounting and cost accounting modules taught on undergraduate accounting courses and for students preparing for the cost and management accounting examinations of the professional accountancy bodies at intermediate or advanced level. It is also appropriate for use by postgraduate and higher national diploma students studying cost and management accounting for the first time.

Management Accounting for Business Decisions

Aimed at non-accounting management students, this textbook offers a thorough introduction to management accounting, approaching the subject from a managerial perspective, without sacrificing accuracy or detail.

The Role of Human Factors in Home Health Care - Workshop Summary

The rapid growth of home health care has raised many unsolved issues and will have consequences that are far too broad for any one group to analyze in their entirety. Yet a major influence on the safety, quality, and effectiveness of home health care will be the set of issues encompassed by the field of human factors research— the discipline of applying what is known about human capabilities and limitations to the design of products, processes, systems, and work environments. To address these challenges, the National Research Council began a multidisciplinary study to examine a diverse range of behavioral and human factors issues resulting from the increasing migration of medical devices, technologies, and care practices into the home. Its goal is to lay the groundwork for a thorough integration of human factors research.
with the design and implementation of home health care devices, technologies, and practices. On October 1 and 2, 2009, a group of human factors and other experts met to consider a diverse range of behavioral and human factors issues associated with the increasing migration of medical devices, technologies, and care practices into the home. This book is a summary of that workshop, representing the culmination of the first phase of the study.
