**Unraveling Trauma in the Body, Brain and Mind—a Revolution in Treatment**  
In this culmination of his life's work, Peter A. Levine draws on his broad experience as a clinician, a student of comparative brain research, a stress scientist and a keen observer of the naturalistic animal world to explain the nature and transformation of trauma in the body, brain and psyche. In an Unspoken Voice is based on the idea that trauma is neither a disease nor a disorder, but rather an injury caused by fright, helplessness and loss that can be healed by engaging our innate capacity to self-regulate high states of arousal and intense emotions. Enriched with a coherent theoretical framework and compelling case examples, the book elegantly blends the latest findings in biology, neuroscience and body-oriented psychotherapy to show that when we bring together animal instinct and reason, we can become more whole human beings.

**Waking the Tiger: Healing Trauma - The Innate Capacity to Transform Overwhelming Experiences**

Now in 24 languages. Nature's Lessons in Healing Trauma... Waking the Tiger offers a new and hopeful vision of trauma. It views the human animal as a unique being, endowed with an instinctual capacity. It asks and answers an intriguing question: why are animals in the wild, though threatened routinely, rarely traumatized? By understanding the dynamics that make wild animals virtually immune to traumatic symptoms, the mystery of human trauma is revealed. Waking the Tiger normalizes the symptoms of trauma and the steps needed to heal them. People are often traumatized by seemingly ordinary experiences. The reader is taken on a
guided tour of the subtle, yet powerful impulses that govern our responses to overwhelming life events. To do this, it employs a series of exercises that help us focus on bodily sensations. Through heightened awareness of these sensations trauma can be healed.

**Trauma and Memory - Brain and Body in a Search for the Living Past: A Practical Guide for Understanding and Working with Traumatic Memory**

In Trauma and Memory, bestselling author Dr. Peter Levine (creator of the Somatic Experiencing approach) tackles one of the most difficult and controversial questions of PTSD/trauma therapy: Can we trust our memories? While some argue that traumatic memories are unreliable and not useful, others insist that we absolutely must rely on memory to make sense of past experience. Building on his 45 years of successful treatment of trauma and utilizing case studies from his own practice, Dr. Levine suggests that there are elements of truth in both camps. While acknowledging that memory can be trusted, he argues that the only truly useful memories are those that might initially seem to be the least reliable: memories stored in the body and not necessarily accessible by our conscious mind. While much work has been done in the field of trauma studies to address "explicit" traumatic memories in the brain (such as intrusive thoughts or flashbacks), much less attention has been paid to how the body itself stores "implicit" memory, and how much of what we think of as "memory" actually comes to us through our (often unconsciously accessed) felt sense. By learning how to better understand this complex interplay of past and present, brain and body, we can adjust our relationship to past trauma and move into a more balanced, relaxed state of being. Written for trauma sufferers as well as mental health care practitioners, Trauma and Memory is a groundbreaking look at how memory is constructed and how influential memories are on our present state of being.

**Freedom from Pain - Discover Your Body's Power to Overcome Physical Pain**

If you are suffering chronic pain—even after years of surgery, rehabilitation, and medication—only one question matters: How do I find lasting relief? With Freedom from Pain, two pioneers in the field of pain and trauma recovery address a crucial missing factor essential to long-term healing: addressing the unresolved emotional trauma held within the body. Informed by their founding work in the Somatic Experiencing® process and unique insights gleaned from decades of clinical success, Drs. Levine and Phillips will show you how to: Calm the body’s overreactive “fight” response to pain Release the fear, frustration, and depression intensified by prior traumas, and build inner resilience and self-regulation Relieve pain caused by the aftermath of injuries, surgical procedures, joint and muscle conditions, migraines, and other challenges Whether you’re seeking to begin a self-care strategy or amplify your current treatment program, Freedom from Pain will provide you with proven tools to help you experience long-term relief.

**Trauma-Proofing Your Kids - A Parents' Guide for Instilling Confidence, Joy and Resilience**

Now in 15 languages. Understand the different types of upsets and traumas your child may
experience—and learn how to teach them how to be resilient, confident, and even joyful. The number of anxious, depressed, hyperactive and withdrawn children is staggering—and still growing! Millions have experienced bullying, violence (real or in the media), abuse or sexual molestation. Many other kids have been traumatized from more “ordinary” ordeals such as terrifying medical procedures, accidents, loss and divorce. Trauma-Proofing Your Kids sends a lifeline to parents who wonder how they can help their worried and troubled children now. It offers simple but powerful tools to keep children safe from danger and to help them “bounce back” after feeling scared and overwhelmed. No longer will kids have to be passive prey to predators or the innocent victims of life’s circumstances. In addition to arming parents with priceless protective strategies, best-selling authors Dr. Peter A. Levine and Maggie Kline offer an antidote to trauma and a recipe for creating resilient kids no matter what misfortune has besieged them. Trauma-Proofing Your Kids is a treasure trove of simple-to-follow “stress-busting,” boundary-setting, sensory/motor-awareness activities that counteract trauma’s effect on a child’s body, mind and spirit. Including a chapter on how to navigate the inevitable difficulties that arise during the various ages and stages of development, this ground-breaking book simplifies an often mystifying and complex subject, empowering parents to raise truly confident and joyful kids despite stressful and turbulent times.

**Trauma Through a Child's Eyes - Awakening the Ordinary Miracle of Healing**

An essential guide for recognizing, preventing, and healing childhood trauma, from infancy through adolescence—what parents, educators, and health professionals can do. Trauma can result not only from catastrophic events such as abuse, violence, or loss of loved ones, but from natural disasters and everyday incidents such as auto accidents, medical procedures, divorce, or even falling off a bicycle. At the core of this book is the understanding of how trauma is imprinted on the body, brain, and spirit, resulting in anxiety, nightmares, depression, physical illnesses, addictions, hyperactivity, and aggression. Rich with case studies and hands-on activities, Trauma Through a Child's Eyes gives insight into children’s innate ability to rebound with the appropriate support, and provides their caregivers with tools to overcome and prevent trauma.

**Healing Trauma - A Pioneering Program for Restoring the Wisdom of Your Body**

Researchers have shown that survivors of accidents, disaster, and childhood trauma often endure lifelong symptoms ranging from anxiety and depression to unexplained physical pain, fatigue, illness, and harmful "acting out" behaviors. Today, professionals and clients in both the bodywork and the psychotherapeutic fields nationwide are turning to Peter A. Levine's breakthrough Somatic Experiencing® methods to actively overcome these challenges. In Healing Trauma, Dr. Levine gives you the personal how-to guide for using the theory he first introduced in his highly acclaimed work Waking the Tiger. Join him to discover: how to develop body awareness to "renegotiate" and heal traumas by "revisiting" them rather than reliving them; emergency "first-aid" measures for times of distress; and nature's lessons for uncovering the
physiological roots of your emotions." Trauma is a fact of life," teaches Peter Levine, "but it doesn't have to be a life sentence." Now, with one fully integrated self-healing tool, he shares his essential methods to address unexplained symptoms of trauma at their source—the body—to return us to the natural state in which we are meant to live in. Contents Introduction: A Tiger Shows the Way Chapter One: What is Trauma? Chapter Two: The Causes and Symptoms of Trauma Chapter Three: How Trauma Affects the Body Chapter Four: Twelve-Phase Healing Trauma Program: A Guide to the Audio Exercises Chapter Five: Sexual Trauma: Sexual Trauma: Healing the Sacred Wound Chapter Six: Spirituality and Trauma: Pathway to Awakening Helpful Tips and Techniques for Preventing Trauma Additional Resources About the Author About Sounds True Excerpt Trauma is the most avoided, ignored, denied, misunderstood, and untreated cause of human suffering. When I use the word trauma, I am talking here about the often debilitating symptoms that many people suffer from in the aftermath of perceived life-threatening or overwhelming experiences. Recently, trauma has been used as a buzzword to replace everyday stress, as in, "I had a traumatic day at work." However, this use is completely misleading. While it is true that all traumatic events are stressful, all stressful events are not traumatic. Unique to Each Individual When it comes to trauma, no two people are exactly alike. What proves harmful over the long term to one person may be exhilarating to another. There are many factors involved in the wide range of response to threat. These responses depend upon genetic make-up, an individual’s history of trauma, even his or her family dynamics. It is vital that we appreciate these differences. Simply knowing that certain kinds of early childhood experiences can severely diminish our ability to cope and be present in the world may elicit compassion and support rather than harsh judgment, both for ourselves and for others. Perhaps the most important thing I have learned about trauma is that people, especially children, can be overwhelmed by what we usually think of as common everyday events. Until recently, our understanding of trauma was limited to “shell-shocked” soldiers who have been devastated by war, victims of severe abuse or violence, and those who have suffered catastrophic accidents and injuries. This narrow view could not be further from the truth. The fact is that, over time, a series of seemingly minor mishaps can have a damaging effect on a person. Trauma does not have to stem from a major catastrophe. Some common triggering events include: • Automobile accidents (even fender benders) • Routine invasive medical procedures • Loss of loved ones • Natural disasters, such as earthquakes and hurricanes • Even falling off a bicycle can be overwhelming to a child under certain circumstances. We will discuss those circumstances later. For now, I will simply say that almost all of us have experienced some form of trauma, either directly or indirectly.

The Actor's Secret - Techniques for Transforming Habitual Patterns and Improving Performance

Offering revolutionary new training for the actor, The Actor's Secret teaches actors and performers how to incorporate the fundamentals of the Alexander Technique, Somatic Experiencing®, and Breathing Coordination in order to reduce performance anxiety and stress; improve stage presence, breathing, and vocal production; and restore well-being and healthy functioning. These three kinesthetic disciplines are designed to lead to profound change and healing through body-mind reeducation. Part I explains in detail the principles of the three techniques. A practical method for self-improvement and neuromuscular reeducation, the
Alexander Technique focuses on changing inefficient habits of movement and patterns of tension that inhibit the ability to move easily. Breathing Coordination helps increase breathing capacity and awareness. A method for resolving emotional trauma, Somatic Experiencing® follows a process of tracking bodily sensations to restore vitality and health. Enhanced with over 100 instructive photos, Parts II and III present explorations and exercises that draw on elements of the three methods. Topics covered include the importance of presence and non-doing; the proper mechanics of vocalization and singing; the understanding of character and role; and the actor’s journey from auditions to performance, including initial script preparation, rehearsal, monologue, and scene work. Developed by Betsy Polatin, a movement specialist and master lecturer at Boston University’s College of Fine Arts, the book’s exercises provide the actor with simple tools for exploring his or her acting work. Most techniques and self-help books teach a new way of "doing." The secret of this book lies in "non-doing." When the actor learns to first recognize and then suspend habitual patterns, he or she opens the door to deeper artistic choices. "I have worked with many fine Alexander Technique teachers over the years and Betsy Polatin is far and away one of the finest. Her touch, her instincts, and her knowledge are miraculous."—Andre Gregory, actor and director, My Dinner with Andre

**Overcoming Trauma through Yoga - Reclaiming Your Body**

Survivors of trauma—whether abuse, accidents, or war—can end up profoundly wounded, betrayed by their bodies that failed to get them to safety and that are a source of pain. In order to fully heal from trauma, a connection must be made with oneself, including one’s body. The trauma-sensitive yoga described in this book moves beyond traditional talk therapies that focus on the mind, by bringing the body actively into the healing process. This allows trauma survivors to cultivate a more positive relationship to their body through gentle breath, mindfulness, and movement practices. Overcoming Trauma through Yoga is a book for survivors, clinicians, and yoga instructors who are interested in mind/body healing. It introduces trauma-sensitive yoga, a modified approach to yoga developed in collaboration between yoga teachers and clinicians at the Trauma Center at Justice Resource Institute, led by yoga teacher David Emerson, along with medical doctor Bessel van der Kolk. The book begins with an in-depth description of trauma and post-traumatic stress disorder (PTSD), including a description of how trauma is held in the body and the need for body-based treatment. It offers a brief history of yoga, describes various styles of yoga commonly found in Western practice, and identifies four key themes of trauma-sensitive yoga. Chair-based exercises are described that can be incorporated into individual or group therapy, targeting specific treatment goals, and modifications are offered for mat-based yoga classes. Each exercise includes trauma-sensitive language to introduce the practice, as well as photographs to illustrate the poses. The practices have been offered to a wide range of individuals and groups, including men and women, teens, returning veterans, and others. Rounded out by valuable quotes and case stories, the book presents mindfulness, breathing, and yoga exercises that can be used by home practitioners, yoga teachers, and therapists as a way to cultivate awareness, tolerance, and an increased acceptance of the self.
